

About Us

We have now started in more than 115 countries in the increasingly competitive property market for real estate agents and for property manager to give all Franchise Partners the option to work with no restrictions. The property market can be very tough. Therefore we believe that the Franchise Partner needs, of course, to focus on his main business in their own market. However, in addition there are a lot of possibilities that can be reached in a straightforward business. If the possibility is there and you have restrictions, it can be frustrating. With our national and global brand, you can be part of a start- up network without restrictions, with your own aims and freedom, just as an independent business owner with expertise in the real estate sector and their own market. We offer beginners, independent real estate agents, independent property manager and entrepreneurs the ability to reach an increasingly competitive market with our unique international brand, in your chosen region or local market. We will support you in reaching your goals.
